ENVIRONMENTAL HAZARD

This product is toxic to fish and wildlife. Do not apply this product directly to water. Do not contaminate water when disposing of equipment wash waters.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use, in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in **tamper-resistant** bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS:

This product may be used to control Norway rats, roof rats, and house mice in and around homes, industrial buildings and similar man-made structures. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with foods. Do not broadcast the bait.

SELECTION OF TREATMENT AREAS:

Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where signs of rats or mice have been seen. Protect bait from rain or snow. For best results, remove as much foodstuff, as possible, from the area to be baited.

APPLICATION DIRECTIONS

For Rats: Apply **2 to 8 blocks** (4 to 16 oz. of bait) per placement. Space bait placements at intervals of 15 to 30 feet in infested area. Maintain an uninterrupted supply of bait for at least 10 days or until there no longer are signs of new feeding by rats.

For Mice: While wearing waterproof gloves, break each 2 oz. block into 3 pieces. Use one such piece of bait block per typical placement. Space placements at intervals of 8- to 12- feet in infested area. At points of extremely high mouse activity, two or three pieces of bait block (up to 2 oz.) or one entire block may be placed. Maintain an uninterrupted supply of fresh bait for at least 15 days or until fresh signs of feeding by house mice cease to appear.

Follow Up (for Rats & Mice): Immediately replace contaminated or spoiled bait. Properly collect and dispose of all dead animals and any leftover bait. To discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. Where a continuous source of infestation is present, establish permanent bait stations. Regularly check the stations and replace bait as needed.

NOTICE: Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
